

Product Manager, Boston MA

Third Pole, Inc. is a growing cardiopulmonary therapeutics company that is developing a unique technology to make inhaled nitric oxide (NO) from air. Inhaled NO an effective tool, but tanks are not widely accessible for treating pulmonary hypertension worldwide. Our tank-less product will offer a disruptive solution which will allow us easy entry to both US and Global markets. Our product will be so simple to use that babies who currently lack access to this medicine will soon be treated; saving lives in China, India or Kenya, etc. etc.

We are looking for an experienced Product Manager who is passionate about building products that customers love. Come join our dynamic and fast-paced environment and working with our cross-functional teams to design, build and roll-out our new world changing products.

Responsibilities

- Act as a product evangelist for the product both internally and with key external partners
- Developing product pricing and positioning strategies
- Translating product strategy into detailed requirements and prototypes
- Gain a deep understanding of customer experience in the healthcare space, identify and fill gaps
- Scope and prioritize activities based on business and customer impact
- Work closely with engineering teams to deliver with quick time-to-market and optimal resources
- Plan and support clinical trial phases for new products
- Drive product launches including working with public relations team, executives, and other product management team members

Requirements

- Proven work experience throughout the product life cycle within the healthcare market
- Proven ability to develop product and marketing strategies and effectively communicate recommendations to executive management
- Solid technical background with understanding and/or hands-on experience in software development and web technologies
- Solid clinical background with understanding of the human physiology, the clinical workflow, and applied technologies in hospital critical care
- Understanding of the healthcare environment (FDA, CE Mark, etc.) regulatory and safety requirements
- Possess strong problem solving skills and willingness to roll up one's sleeves to get the job
- Skilled at working effectively with cross functional teams in a matrix organization
- Understanding of advanced project and product specification management such as Agile or similar
- MS/BS degree in Engineering, Biomedical, Respiratory Therapist, Nursing or equivalent preferred
- Traveling 15-30% of the time domestically and/or abroad required

Continue your career while saving babies around the world with our brilliant technology!
